

Aerial Boomlift & Scissor Lift Certification

The AWP Certification is a comprehensive training course conducted in a classroom. It consists of a classroom presentation, written test, hands-on practice and skills testing session. The classroom portion focuses on the fundamental information needed for the safe operation of an aerial boomlift and scissor lift. The hands-on portion provides the opportunity to practice skills in a safe environment under the direct supervision and coaching of our professional instructors.

This training is not make or model specific but covers concepts common to all major brands of aerial boom lifts and scissorlifts.

Upon completion of this training program, you will be knowledgeable and demonstrate proficiency in:

- primary parts and their functions;
- safety systems;
- pre-use inspection, safe operating procedures;
- limitations, hazards and controls.

Upon successful completion, we will provide an operator's certification in the form of a wallet card.

A minimum score of 70% is required to pass the theory test.
