

# Counterbalance & Rough Terrain Forklift ReCertification

The counterbalance & rough terrain forklift re-certification course is administered to enhance the skills of a previously trained operator. It reviews the information originally provided and re-tests to ensure understanding and maximum proficiency. A written test and practical evaluation are included in the training during which operator skills will be evaluated using industry standards. The training is not make or model specific but covers concepts common to most major brands of counterbalance & rough terrain forklifts.

Renewal of operator certification is required every three years in the US for forklifts.

Upon completion of this requalification program, you will display an understanding and proficiency in:

- counterbalance & rough terrain forklift basics;
- rules and regulations;
- types;
- main parts and their functions;
- safety systems;
- pre-use inspection, safe operating procedures;
- limitations, hazards and controls.

Upon successful completion, we will provide an updated operator's certificate in the form of a wallet card.
