

Primary Equipment Group Certification

The primary equipment group certification provides the skills needed to operate boomlifts, scissor lifts, counterbalance forklifts, and rough terrain forklifts. A written test and practical evaluation are included in the training. Operator skills will be monitored and evaluated using industry standards. The training is not make or model specific but covers concepts common to most major brands of the equipment covered.

Renewal of operator certification is required every three years in the US for forklifts.

Upon completion of this program, you will gain knowledge and demonstrate proficiency in:

- equipment basics;
- rules and regulations;
- types;
- main parts and their functions;
- safety systems;
- pre-use inspection, safe operating procedures;
- limitations, hazards and controls.

Upon successful completion, we will provide an operator's certificate for each piece of equipment in the form of a wallet card.

Note: Forklift recertification training must be completed within the three years allowed by Federal standards in the United States.

Course Details

Pricing Structure

Participants	Per Participant
1 to 4	\$525.00 USD
5 to 14	\$475.00 USD
15 (+)	\$425.00 USD

Delivery Structure

Duration: 2 days
Delivery: Classroom

Equipment Covered:

- Vertical Mast Lifts
- Scissor Lifts
- Boom Lifts
- Industrial Fork Trucks
- Rough Terrain Forklifts/Telehandlers

Course Code: PEG-C
