

# Rough Terrain Telehandler Certification

The RTT Certification is a comprehensive training course conducted in a classroom. It consists of a classroom presentation, written test, hands-on practice and skills testing session. The classroom portion focuses on the fundamental information needed for the safe operation of rough terrain telehandlers. The hands-on portion provides the opportunity to practice skills in a safe environment under the direct supervision and coaching of our professional instructors.

This training is not make or model specific but covers concepts common to all major brands of rough terrain telehandlers.

Upon completion of this training program, you will be knowledgeable and demonstrate proficiency in:

- rough terrain forklift basics,
- rules and regulations,
- types, main parts and their functions,
- safety systems,
- pre-use inspection,
- safe operating procedures,
- limitations, hazards and controls.

A minimum score of 70% is required to pass the theory test.
