

# Aerial Scissor Lift Familiarization

Mazzotta Rentals offers a scissor lift familiarization course program. This course is intended only for those operators who have previously received general training. In essence, it is a “refresher” course designed to supplement the existing general knowledge of previously trained and qualified operators with information and instruction specific to the unit (s) they are assigned to operate at the worksite.

The Aerial Scissor Lift Familiarization course is not a substitute for general training and should not be confused with an operator certification training course.

Please be advised that it is the employer’s responsibility to ensure that workers are trained properly.

## Course Details
